

**STREATOR**  
**DEPENDABLE MFG.**

MATERIAL  
HANDLING

# FORGING CONTAINERS

**Strength** – Designed to be rugged – floors, sides, corners – with welds that are strategically located and designed to match the toughness of the steel.

**Experience** – We have over 55 years experience in corrugated steel construction and know the design criteria required to build the right box for your operation.

- What type of material will be handled?
- How will material be loaded and how far will forgings fall into the containers?
- Will containers be stacked?
- Will containers handle extremely hot material and need to dissipate heat?
- How will the containers be emptied?
- Will the containers be used for shipment or in-house only?

*We'll work with your drawings or design containers to your specific operation. Contact us today or visit us on our website at [www.streatordependable.com](http://www.streatordependable.com)*
